

Principal's Report

Annual General Meeting, October 29, 2025

The 2024-2025 school year was an exciting one as we spent a full year learning and playing in our renovated and expanded facility. Our experiences confirmed that the many years of research and planning for our important capital project contributed to additional and new space that successfully supports our 2025 strategic vision of developing and equipping courageous and adaptable learners and empowering them to make impactful contributions in local, national, and global communities.

Throughout the year, students from Grades 1-12 continued to be challenged and supported in their learning both inside and outside the classrooms. In learning *how* to learn, our Clementines are becoming increasingly independent and developing the important competencies of character, communication, collaboration, critical thinking, citizenship, and creativity. The students' achievements in a vast array of curricular and co-curricular areas were consistent and strong because of their hard work, intellectual curiosity, and the support they received from staff and families alike.

The 2024-2025 school year was also an important year to take stock of our accomplishments while also researching about and reflecting on the necessary skills our Clementines will need to be successful in whatever they choose to do. We must ensure that we continue to boldly articulate our School's remarkable strength and value; ensuring that we are showcasing our confidence and pride along with our traditional humility. I am immensely grateful to our entire staff, our school leaders and our Board of Governors for their investment of time to do this work.

As the year wound down, we witnessed the class of 2025 making decisions about the next steps in their lives. Our 56 graduates are now attending 23 different university destinations in Canada, US and International.

I wish to thank our entire St. Clement's School community for their commitment to and support of our mission to develop outstanding women who are intellectually curious, courageous, and compassionate. Our students, staff, parents, alums, and community friends all play a part in this important work.
